International Journal of
HYDROGEN ENERGY

Official Journal of the International Association for Hydrogen Energy

AIMS AND SCOPE

This is the official journal of the International Association for Hydrogen Energy. It aims to provide a central vehicle for exchange and dissemination of basic ideas in the field of hydrogen energy between research scientists and engineers throughout the world. The emphasis will be placed on original research, both analytical and experimental, of permanent interest to engineers and scientists in various aspects of hydrogen energy, namely production, storage, transmission, utilization, as well as the economical, environmental and international aspects.

When outstanding new advances are made in existing areas of hydrogen energy, or when new areas have been developed to a definitive stage, special review articles will be considered.

To encourage exchange of ideas, a section of the Journal will be devoted to discussion of previously published papers. Shorter communications are also invited and should not exceed 1500 words.

As a service to our readers an international bibliography of recent publications in hydrogen energy listed by title, author and source will appear quarterly in the Journal.

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to the IAHE if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organizations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying information for users in the U.S.A.

The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the United States Copyright Law, is paid. The appropriate remittance of $30.00 per copy per article is paid directly to the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, U.S.A.

Permission for other use

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher and the IAHE for such copying.

Whilst every effort is made by the publishers and editorial board to see that no inaccurate or misleading data, opinion or statement appears in this journal, they wish to make it clear that the data and opinions appearing in the articles and advertisements herein are the sole responsibility of the contributor or advertiser concerned. Accordingly the publishers, the editorial board and editors and their respective employees, officers and agents accept no responsibility or liability whatsoever for the consequences of any such inaccurate or misleading data, opinion or statement.

⊗ The paper used in this publication meets the requirements of ANSI/NISO Z39.48–1992 (Permanence of Paper)
